

HOW TO TIE AGRIWIRE?

NUOVAFIL PVT LTD

PRODUCTS

GARVILON AGRIWIRE : HIGH STRENGTH & LOW STRETCH

These wires are made in sizes from 1.5mm to 5.0mm in Polyester and Copolymer. They are specially designed for Grape Farms for their 'Y' and 'Mandap' structure. These wires are the replacement of G.I./Stainless Steel Wires used for supporting plants such as Grapes, Tomato, pomegranate, cucumber etc. They are available in Black and in other colors as per customer requirement. More than 1000 tons are already being used by farmers till date without any problems as per our estimate.

Specification & Benefits:

- 50% more cheaper
- UV Stabilized
- Life 9 years guaranteed
- Corrosion and abrasive resistant
- Can withstand high temperature
